## PROJECT EXPERIENCE

### **Shipment Dashboard**, *Accenture Services Pvt Ltd, Bangalore*

MAY 2015 - OCTOBER 2015

The shipment dashboard was for the client's operations team to manage and to track the shipments which are being done by them or the third party.

Responsibilities:

1. To create a portlet and a screen in JavaScript and HTML
2. To give options to make changes to the status of those shipments' pickup status

Reusable assets:

1. A program for getting JSON data in one format and converting it to another format using JavaScript
2. A program to generate dynamic drop down lists

Achievements:

1. Learnt about JSON
2. Moved quickly in multiple teams

### **Batch Application**, *Accenture Services Pvt Ltd, Mumbai*

MARCH 2015 - MAY 2015

The batch application is used to purge data from the server, change multiple status flags in the database.

Responsibilities:

1. To create reusable assets for the team

Reusable Assets:

1. A program to extract data from XML files and putting it into database using XPath
2. A program to select those strings which satisfy a particular pattern
3. A program to extract data from CSV files and to put it into database using Spring

Achievements:

1. Received appreciation for optimization in the proof of concepts

### **Transport Application**, *Accenture Services Pvt Ltd, Mumbai*

MARCH 2015 - MAY 2015

The app lists the details of shuttles of Accenture Mumbai- including route, bus number, pickup time, and drop time. It also included feature of creating a reminder on basis of pickup time and drop time.

Responsibilities:

1. To design the flow of application
2. To create an XML database for the project

Achievements:
