## Projects

- Project Title** : **Enrich**

Environment : MVC 5, Web API 2.0, VS 2019 with .net Core, Microsoft Azure, PowerShell and Cosmos DB.

Database : SQL Server 2016

Web Script : JavaScript, jQuery.

Other : GIT, Bit-Bucket, Jira, Confluence

Team Member : 10

Role : Development

Project Details : Enrich is the internal project of Publicis Sapient. It's based on Staffing Module Domain. This project build in 3-layer architecture and in this project, we integrate few portal API like Oracle, Smart Recruiter and Altor. Each Module is has different responsibility e.g. Smart Recruiter is responsible to create reqs.

Responsibilities : Data Access Layer, DLL Files, Coding Development, Documentation, Debugging, DB logics, API Integration, requirements Analysis.
- Project Title** : **X-SU (Scoping and Costing Tool)**

Environment : VS-2015, MVC 5, Web API 2.0, Entity Framework, LINQ

Database : SQL Server 2016

Web Script : JavaScript, jQuery.

Other : SVN, Jira

Team Member : 6

Role : Development

Project Details : X-SU is an Application use by NOKIA GS (Global Services) for scoping and Costing Purpose. This Tool have 4 module and 4 teams are working on each module. I am working on NPO & Analytics module.

Responsibilities : Coding Development, Debugging, DB logics, API Integration, requirements Analysis, Production supports.
- Project Title** : **Transfer Management System**

Environment : VS-2015, MVC 5, Web API

Database : SQL Server2016

Web Script : JavaScript, jQuery.

Other : TFS

Team Member : 2

Role : Development

Project Details : This project based on Offshore and Onsite Employee Transfer Fitment.

Responsibilities : Coding Development, Debugging, DB logics, API Integration, requirements Analysis, Create DB structure for the complete project build, deploy on test, UAT and Production.

4. **Project Title** : **My Compensation**  
 Environment : VS-2015, MVC, Web API  
 Database : SQL Server2016  
 Web Script : JavaScript, jQuery.  
 Other : TFS  
 Team Member : 5  
 Role : Development  
 Project Detail : This project based on Employee Compensation view.  
 Responsibilities : Coding Development, Debugging, DB logics, API Integration, requirements Analysis,  
 Create DB structure for the complete project build, deploy on test, UAT and Production.
5. **Project Title** : **Compensation Planner**  
 Environment : VS-2015, MVC 5, Web API  
 Database : SQL Server2016  
 Web Script : JavaScript, jQuery.  
 Other : TFS  
 Team Member : 7  
 Role : Development, Change Request  
 Project Detail : This project based on Offshore and Onsite Employee Salary and letter release logic.  
 Responsibilities : Coding Development, Debugging, DB logics, API Integration, requirements Analysis,  
 Create DB structure for the complete project build, deploy on test, UAT and Production.
6. **Project Title** : **Kangra Herb**  
 Environment : VS-2012, C#, ASP.net, Entity Framework and LINQ  
 Database : SQL Server2012  
 Team Member : 5  
 Role : Development  
 Project Details : It is the MLM based project. Interested people can register to the site by paying a small amount 500. Once they are registered. They can invest amount by getting one of the plan. It will cause their MLM parents to be benefited. Project involves the modules like, Registration and validation, Wallet, Binary, Referrer, Deposit, Payout, Pin Management and other MLM modules.  
 Responsibilities : Coding Development, DB logics, deploy code on test and Production.
