PROJECTS

- **Sendle Application** - Printer related application which we installed in printer for printing the labels .
- **Shyplite Application** – Printer related application which we installed in printer for printing the labels .
- **MyIdea Application** – Payment And recharge application.
- **Analytics SDK.**
- **Idea relation Manager Application**- this used by idea relation mangers only using Kotlin Language.
- **Alicon Meeting Application** – It show the meeting schedule with notification also we can upload and download file and picture.
- **iProgrammer Application** – Getting employee information, showing Hr Policy and company information.
- **Quizy Application** -This project related to quiz for multiple languages. For this I have used text files to keep the This application counts correct answers, time taken for quiz, maintain Score record. Also used media player.
- **Beautician Appointment Application** - This project related to taking appointment of customer. It takes customer details, appointments dates, reminders etc we do all these things in this application.
- **Parti des togolais Application** - This application is made for promotion for the party for election and Ambition shared a new Togo where everyone has a chance and everyone will count.
- **Society Application** - The members of society register them and give them receipt id and send them sms and email notification immediately after registration. Automate Maintenance Billing Send SMS and email Notices & Due Reminders to society members. It also backup and restore the details of society members.
- **Symptom Checker Application**- Symptom checker application is book the appointment of doctor.
- **Sales Buddy Application** - Sales buddy Application is used for sales person to take details of doctors.
- **Student Checkup Application** - created a mobile/tab based application where the results of the entire medical check-up process is captured in real-time thus creating an immediate record for the individual child along with his/her photograph. We have also created Aadhar Number based unique id for each student of that particular school.
- **AllIzhealth Application** - AllizHealth's App, helps you keep track of all your health information. From tracking various parameters (BP, BMI, Thyroid, Cholesterol etc.) to storing your health data, this app acts as a single repository for all your crucial health data. The App also provides an easy way to add and store health data of your family members as well.
- **Fit Application**- It track the steps.Reach your fitness goals. Set goals based on steps, distance, calories burned.
