

## RESUME

### Kiran Subhash Patil

**Mobile:** (+91)8329798582

**Email:** kiransp1987@gmail.com

---

#### Objective

To associate with an organization which recognizes my skills and offers me diverse job responsibilities according to it to achieve the common goals of the organization due to which I will be able to improve my knowledge and adapt in the new environment as a good team member.

#### Professional Abridgement

- A versatile, highly motivated, and dynamic professional and working with all aspects of projects development life cycle.
- **12** years of relevant experience in .net technologies.
- Expertise in skills set like **.NET 6 framework, .NET Core, .NET Core API, Xunit testing, ASP.NET, ASP.NET MVC, C# .net, Entity Framework and SQL Server Business Applications** in Analysis, Coding, Design, Development, Documentations.
- Expertise in developing the web applications.
- A team player with strong communication and analytical skills.
- Experience with all round development of Web Portal from Database Designing to Deployment of Project.

A team player with strong communication and analytical skills.

#### Technical Skills Set

Technical skills:	.NET core, .NET Core API, C#.NET, ASP.NET MVC, ASP.NET WEB API, VB.NET, Xunit testing , JQuery, SQL Server, Mongo DB, Git Bash, Git, Bitbucket, Team City, JIRA for sprint planning
Framework:	.NET 6

**Professional Experience**

<b>Employer #1</b>	<b>Capgemini, Pune</b> ( <a href="https://www.capgemini.com">https://www.capgemini.com</a> )
Work As	Senior .NET core developer
Role	Working as Senior Software developer for <b>Barclays bank</b> . Using Bitbucket- Git repository management as source version control and Team City for continuous integration process. Following Jira Agile methodology for Barclays project. Working on efforts estimation for the Jira tasks and development for the same. Also using Mongo DB as backend database for storage.
Skills used in project	.NET 6, .Net Core, .NET Core API, C#.NET, Xunit framework, Git Bash for git activities, BitBucket, Mongo DB database. JIRA for sprint planning. Team City for continuous integration. Nolio for deployment.
Duration	Oct 2021 to Present.
Experience	1 years 6 months.
<b>Total Experience</b>	<b>12 years</b>

<b>Employer #2</b>	<b>Cognizant (CTS) , Pune</b> ( <a href="https://www.cognizant.com/">https://www.cognizant.com/</a> )
Work As	Software/Web Developer (Part of Technical Team)
Role	Overall development process for creating a website campaign from Database Designing, Development, Testing, Bug Fixing and Deployment.
Duration	Feb 2016 to Oct 2021.
Experience	5 years 8 month.

<b>Employer #3</b>	<b>Nihilent technology Pvt Ltd. , Pune</b> ( <a href="http://www.nihilent.com/">http://www.nihilent.com/</a> )
Work As	Software/Web Developer (Part of Technical Team)
Role	Overall development process for creating a portal from Database Designing, Development, Testing, Bug Fixing and Deployment.
Duration	October 2012 to Feb 2016.
Experience	<b>3 years 4 months.</b>

<b>Employer #4</b>	<b>zCon Solutions Pvt. Ltd. , Pune</b> ( <a href="http://www.zconsolutions.com/">http://www.zconsolutions.com/</a> )
Work As	Software/Web Developer (Part of Technical Team)
Role	Overall development process for creating a portal from Database Designing, Development, Testing, Bug Fixing and Deployment.
Duration	March 2010 to till date.
Experience	<b>2 year 5 months.</b>

<b>Professional Projects</b>	
<b>Project # 1</b>	<b>Huggies WEB API . (Kimberly-Clark Client)</b>
Duration	Sep 2020 to Till now
Team Size	1
Role	.Net Developer (Team Member)
Domain	Ecommerce
Environment	ASP.NET Web API 2.1, Entity Framework
Details	<ol style="list-style-type: none"> <li>Created Generic WEB API 2.1 for Huggies Brand websites- <ol style="list-style-type: none"> <li><a href="http://www.huggies.co.th">www.huggies.co.th</a></li> <li><a href="http://www.huggies.co.in">www.huggies.co.in</a></li> <li><a href="http://www.huggies.com.vn">www.huggies.com.vn</a></li> <li><a href="http://www.huggies.com.sg">www.huggies.com.sg</a></li> </ol> </li> <li>Created generic common WEB API for huggies brand websites.</li> <li>There are two methods in API <ol style="list-style-type: none"> <li>Process single record</li> <li>Process Bulk records.</li> </ol> </li> <li>The aim of the API is to register end users in huggies database.</li> <li>Agency is calling Huggies API and passing users data(collected from multiple sources like Facebook, offline hospital data) for further processing.</li> </ol>
Roles & Responsibilities.	<ol style="list-style-type: none"> <li>Consultation with clients to identify key requirements and implement the business logic.</li> <li>Working independently as a .Net developer to fix the changes assigned.</li> <li>Solved some performance issues in the application.</li> <li>Configured new database changes as per requirements in the application.</li> <li>Debugging the code to understand the application flow and logic.</li> <li>Presenting timely status reports to clients.</li> <li>Providing technical support to the client for Production issues.</li> </ol>

<b>Professional Projects</b>	
<b>Project # 2</b>	<b>Relay 42 API Consumption. (Kimberly-Clark Client)</b>
Duration	Sep 2019 to Aug 2020

Team Size	1
Role	.Net Developer (Team Member)
Domain	Ecommerce
Environment	ASP.NET MVC, C#.net
Details	<ol style="list-style-type: none"> <li>1. Implemented Relay 42 API integration for below websites - <ol style="list-style-type: none"> <li>a. <a href="http://www.huggies.com.my">www.huggies.com.my</a></li> <li>b. <a href="http://www.huggies.com.vn">www.huggies.com.vn</a></li> <li>c. <a href="http://www.girlspace.com.vn">www.girlspace.com.vn</a></li> </ol> </li> </ol>
Roles & Responsibilities.	<ol style="list-style-type: none"> <li>1. Consultation with clients to identify key requirements and implement the business logic.</li> <li>2. Working independently as a .Net developer to fix the changes assigned.</li> <li>3. Solved some performance issues in the application.</li> <li>4. Configured new database changes as per requirements in the application.</li> <li>5. Debugging the code to understand the application flow and logic.</li> <li>6. Presenting timely status reports to clients.</li> <li>7. Providing technical support to the client for Production issues.</li> </ol>

Professional Projects	
<b>Project # 3</b>	<b>Ecommerce Brand Websites support . (Kimberly-Clark Client)</b>
Duration	Aug 2018 to Aug 2019
Team Size	8
Role	.Net Developer (Team Member)
Domain	Ecommerce
Environment	ASP.net MVC, C#.net, SQL Server 2008
Details	<ol style="list-style-type: none"> <li>1. Worked on minor support activities for registration, free sample and signin and content changes for APAC websites.</li> <li>2. Below are the main APAC brand websites - <ol style="list-style-type: none"> <li>a. <a href="http://www.huggies.co.in">www.huggies.co.in</a></li> <li>b. <a href="http://www.huggies.com.my">www.huggies.com.my</a></li> <li>c. <a href="http://www.huggies.com.sg">www.huggies.com.sg</a></li> <li>d. <a href="http://www.huggies.co.th">www.huggies.co.th</a></li> <li>e. <a href="http://www.huggies.com.ph">www.huggies.com.ph</a></li> <li>f. <a href="http://www.huggies.co.id">www.huggies.co.id</a> etc.</li> </ol> </li> </ol>
Roles & Responsibilities.	<ol style="list-style-type: none"> <li>1. Consultation with clients to identify key requirements and implement the business logic.</li> <li>2. Working independently as a .Net developer to fix the changes assigned.</li> <li>3. Solved some performance issues in the application.</li> <li>4. Configured new database changes as per requirements in the application.</li> </ol>

	5. Debugging the code to understand the application flow and logic. 6. Presenting timely status reports to clients. 7. Providing technical support to the client for Production issues.

Professional Projects	
<b>Project # 4</b>	<b>Ecommerce Website Campaigns. (Kimberly-Clark Client)</b>
Duration	Feb 2016 to Aug 2018
Team Size	5
Role	.Net Developer (Team Member)
Domain	Ecommerce
Environment	ASP.net MVC, C#.net, SQL Server 2008
Details	<ol style="list-style-type: none"> <li>1. Huggies Gold</li> <li>2. Huggies Pome</li> <li>3. Admin section for Campaign</li> </ol>
Roles & Responsibilities.	<ol style="list-style-type: none"> <li>1. Consultation with clients to identify key requirements and implement the business logic.</li> <li>2. Working independently as a .Net developer to fix the changes assigned.</li> <li>3. Solved some performance issues in the application.</li> <li>4. Configured new database changes as per requirements in the application.</li> <li>5. Debugging the code to understand the application flow and logic.</li> <li>6. Presenting timely status reports to clients.</li> <li>7. Providing technical support to the client for Production issues.</li> </ol>

Professional Projects	
<b>Project # 5</b>	<b>IRewards</b>
Duration	January 2015 to Feb 2016
Team Size	7
Role	.Net Developer (Team Member)
Domain	Ecommerce
Environment	ASP.net, VB.net, C#.net, WCF, Telerik Controls, SQL Server 2008, JavaScript.
Details	<p>The Reward Re-engineering project is aimed at providing customers real time redemption through various Nedbank servicing channels as well as enabling using their points as payment at e-commerce and physical channel merchants. Project Scope: Nedbank perspective - Scope of the project based on the BRS/DRS is to enhance the CVP for customers as part of delivering on Card Rewards strategy, to enable merchant funded rewards based on a campaign basis, and Capability for integration of rewards websites, .mobi site and rewards widget. Nihilent perspective - Nihilent has to enhance and develop front end component of Rewards Re-engineering</p>

	program. Project Execution Approach: The project will be managed from offshore and executed under offshore-on-site model.
Roles & Responsibilities.	<ol style="list-style-type: none"> <li>1. Consultation with clients to identify key requirements and implement the business logic.</li> <li>2. Working independently as a .Net developer to fix the changes assigned.</li> <li>3. Solved some performance issues in the application.</li> <li>4. Configured new database changes as per requirements in the application.</li> <li>5. Debugging the code to understand the application flow and logic.</li> <li>6. Presenting timely status reports to clients.</li> <li>7. Providing technical support to the client for Production issues.</li> </ol>

Professional Projects	
<b>Project # 2</b>	<b>Dynamic Online Forms</b>
Duration	October 2013 to December 2014
Team Size	8
Role	.Net Developer (Team Member)
Domain	Banking
Environment	ASP.net MVC 3.0
Details	Project Scope Main focus of the project is to achieve retail product sales through <a href="http://www.nedbank.co.za">http://www.nedbank.co.za</a> , one of the Nedbank's primary interfaces with the retail client. By offering an online application process the customer experience is enhanced, whilst the cost of the sales will be reduced. The project aims to reduce human intervention in the application process by implementing a dynamic online application form solution.
Roles & Responsibilities.	<ol style="list-style-type: none"> <li>1. Consultation with clients to identify key requirements and implement the business logic.</li> <li>2. Working independently as a .Net developer to fix the changes assigned.</li> <li>3. Solved some performance issues in the application.</li> <li>4. Configured new database changes as per requirements in the application.</li> <li>5. Debugging the code to understand the application flow and logic.</li> <li>6. Presenting timely status reports to clients.</li> <li>7. Providing technical support to the client for Production issues.</li> </ol>

Professional Projects	
<b>Project # 3</b>	<b>TI Admin</b>
Duration	October 2012 to September 2013
Team Size	8
Role	.Net Developer (Team Member)
Domain	Banking

Environment	ASP.net MVC 3.0
Details	<p>Main focus of the project is to develop a UI component to administer templates and audit logs to continuously enhance the value proposition for its customers. Nedbank requires a single Sign-On (via Windows authentication) which allows administrators to perform administrative tasks and users to view / resend files. Project Execution Approach Requirements and detailed design will be delivered by client and Nihilent will manage and execute development and later phases from offshore. One Technical On-site coordinator will be present at Nedbank premises during the execution of the project. Nihilent is currently working on TI Host which is part of CC release; it would help Nedbank to get a holistic approach on execution where Nihilent can help to understand internal dependencies and reduce risk. Nihilent has gained good working experience using ASP.Net MVC3 framework on Dynamic Forms project. TI Admin project is getting executed by Durban SD team and Nihilent has gained good working repo with Durban team. This experience will help clients to do smooth execution of project by minimizing issues and complexity of task. Nihilents Commitment Nihilent will help Nedbank to meet its much-needed deadline. Help Nedbank to minimize risk on execution identifying internal dependencies and mitigate those upfront. Nihilents Benefit Nihilent has an opportunity to get entry in the Durban SD area and prove our strong development abilities to deliver project from offshore for multiple client locations. It helps in gaining client confidence by showing our expertise in various Nedbank systems and various frameworks i.e. ASP MVC.</p>
Roles & Responsibilities.	<ol style="list-style-type: none"> <li>1. Consultation with clients to identify key requirements and implement the business logic.</li> <li>2. Working independently as a .Net developer to fix the changes assigned.</li> <li>3. Solved some performance issues in the application.</li> <li>4. Configured new database changes as per requirements in the application.</li> <li>5. Debugging the code to understand the application flow and logic.</li> <li>6. Presenting timely status reports to clients.</li> <li>7. Providing technical support to the client for Production issues.</li> </ol>

Professional Projects	
<b>Project # 4</b>	<b>EcoDomus Construction Management System (U.S.) (<a href="http://www.ecodomus.com">www.ecodomus.com</a>)</b>
Duration	October 2011 to till present
Team Size	15
Role	.Net Developer (Team Member)
Domain	Construction (Development, Enhancement, Maintenance)
Environment	ASP.net, VB.net, C#.net, WCF, Telerik Controls, SQL Server 2008, JavaScript, and Aspose controls.
Details	EcoDomus is a software solution dedicated to enabling the usage of Building Information Model (BIM) and Lean construction processes for new construction or renovation of existing buildings.

	<p>EcoDomus is emerging as a central hub for different facility management software applications by having the capability of integrating its BIM data with different applications like FAMIS, TMA Systems etc.</p> <p>EcoDomus is the leading COBie software provider and also enables populating "dumb 3D" models with information to create an "intelligent BIM" model - a Building Information Model where all objects have parameters assigned and documents attached which are useful for operation and maintenance purposes. The web application has been coded using C#.net and WCF services.</p>
Roles & Responsibilities.	<ol style="list-style-type: none"> <li>1. Consultation with clients to identify key requirements and implement the business logic.</li> <li>2. Working independently as a .Net developer to fix the changes assigned.</li> <li>3. Solved some performance issues in the application.</li> <li>4. Configured new database changes as per requirements in the application.</li> <li>5. Debugging the code to understand the application flow and logic.</li> <li>6. Presenting timely status reports to clients.</li> <li>7. Providing technical support to the client for Production issues.</li> </ol>

<b>Project # 5</b>	<b>(Insurance Processing Application)(<a href="http://cedb.claimseval.com">http://cedb.claimseval.com</a>)</b>
Duration	March 2011 to September 2011.
Team Size	2
Role	Software Developer (Team Member)
Environment	ASP.net, C#, SQL Server 2008, Ajax, JavaScript, JQuery
Details	<p>This is a system for preparing and filing the insurance claim for medical treatment. The patient's treatment data is sent by the clinical staff through this, to the Insurance Company. The panel doctor for the insurance company is able to see all the medication and treatment related data. He can then approve or disapprove the claim. We made several enhancements to the existing system. Developed various dashboards for the client like Doctor Dashboard, P2PDashboard, Staff Dashboard Waiting View Enhancement, Peer File Reviews Enhancement On Staff Dashboard, Client Nurse Report, Report Preparer Report, Client Billing Report etc.</p>
Roles & Responsibilities	<ol style="list-style-type: none"> <li>1. Developed &amp; enhanced some of the pages in this web application.</li> <li>2. Presenting timely status reports to clients.</li> <li>3. Providing technical support to the client for Production issues.</li> </ol>

<b>Project # 6</b>	<b>(Employee Verification Application)</b>
Duration	October 2010 to March 2011.
Team Size	8
Role	Software Developer (Team Member)
Environment	ASP.net, C#, SQL Server 2008, Ajax, JavaScript, JQuery

Details	This is a Human resource outsourcing company. They conduct a number of surveys for their client companies with respect to the employees. These verifications include educational qualification verification, criminal verification and much similar kinds of employee verifications. Developed two main applications, one is to allocate verification work and other is for the processor to process the verifications. Also worked on package customization where the client company can choose a charging model and specific surveys/verifications relevant to them.
Roles & Responsibilities	<ol style="list-style-type: none"> <li>1. Developed &amp; enhanced some of the pages in this web application.</li> <li>2. Presenting timely status reports to clients.</li> <li>3. Providing technical support to the client for Production issues.</li> </ol>

Project # 7	
Project # 7	Web Crawler
Duration	May 2010 to September 2010
Team Size	2
Role	.NET Developer (Team Member)
Environment	VB.NET Windows Application, WebBrowser control in Windows Application. SQL-Server 2008, JavaScript.
Details	<p>WebCrawler (also known as a Web spider or Web robot) is a program or automated script which browses the World Wide Web in a methodical, automated manner.</p> <p>Client is Providing the site urls (Criminal search sites) like (<a href="http://www.fcmcclerk.com">www.fcmcclerk.com</a>) and we are parsing and later on storing all the data in SQL server database.</p> <p>Performing criminal search within site and storing match criteria within Sql server database.</p>
Roles & Responsibilities	<ol style="list-style-type: none"> <li>1. Developed new application WebCrawler Criminal search application</li> <li>3. Consultation with clients to identify key requirements and implement the business logic.</li> <li>4. Working independently as a .NET developer to fix the changes assigned.</li> <li>5. Solved some performance issues in the application.</li> <li>6. Configured new database changes as per requirements in the application.</li> <li>7. Debugging the code to understand the application flow and logic.</li> <li>8. Presenting timely status reports to clients.</li> <li>9. Providing technical support to the client for Production issues.</li> </ol>
