

PROFESSIONAL SUMMARY

I have around 11 years of experience in Software Engineering & Development, Project Management, Designing, Coding, Testing and Documentation along with 9-month onsite experience. Skilled in developing software solutions by studying information needs; conferring with user, studying systems flow, data usage, and work processes, investigating problem areas and following the software development lifecycle. Possess knowledge of OOPs Concepts, C#, .Net Core, React JS, Angular 8, Entity Framework & Azure functions.

SKILL SUMMARY

- **Programming languages:** C#, SQL, JavaScript ES6, Type Script
- **Cloud:** Azure function , service bus, Logic app
- **Integrated Development Environment:** Visual Studio, T-SQL,
- **.NET Technologies:** ASP.NET Core , MVC, LINQ, Web API
- **Scripting:** React Js, Angular 8, jQuery
- **Database:** MSSQL
- **Project Management:** Git, Azure DevOps
- **Unit Testing** – xUnit, FakeItEasy, T-SQLt
- **Deployment Tools-** Teamcity, Octopus

WORK EXPERIENCE

Medefis Resource management

Jan 2021 – Present

The Medefis Vendor-Neutral Managed Services Program (MSP) combines a personalized, hands-on managed service experience with our easy-to-use vendor management system (VMS) platform. This provides a streamlined, centralized approach to contingent labor management, giving you access to millions of healthcare professionals, from hundreds of Medefis-vetted staffing agencies with real-time market rates.

Role: Team Lead

Technologies: C#, .NET Core, Azure, Web API, Azure Devops, React Js, xUnit, Tsqlt test, MS SQL Server 2016

Responsibilities

Generating:

- Modules and Engines
- UI/Views for the Modules and Controllers/API Controllers for the Views.
- Managers for Modules to Handle Business Logic through nugget Package resource

Formulating:

- Presentation layer using React Js component
- Data Access Layer with the help of Entity Framework
- Business Logic Layer using Web Api (Controller)
- Development and testing of User Interfaces
- Development and testing of different features

Isagenix Ecommerce Portal

Feb 2020 – Dec 2020

Isagenix is a global health and wellness organization, offering solutions to transform lives. Supporting people with weight loss, energy and wellness, physical performance, and healthy aging, Isagenix also offers an additional income stream through network marketing. Its users can earn substantial side or full-time income by sharing the company's proven products as weight wellness coaches to new users.

Role: Senior consultant |

Technologies: C#, .NET Core, Angular 8, SQL Server 2016

Responsibilities

Generating:

- Modules and Engines
- UI/Views for the Modules and Controllers/API Controllers for the Views.
- Managers for Modules to Handle Business Logic through nugget Package resource

Formulating:

- Presentation layer using angular component
- Data Access Layer with the help of Entity Framework
- Business Logic Layer using Web Api (Controller)
- Development and testing of User Interfaces
- Development and testing of different features

Esyndico

Apr 2017 - Aug 2019

Esyndico is the affordable, collaborative, plug & play web-based and mobile solution that helps property managers, residents and suppliers to streamline their operations and communication for a "happier" community. It integrates various units such as Property Management, Facility Management and Property Accounting into a single unit. It facilitates, the user or the community administrator to manage all the units and provides an interactive system to the community users.

Role: Module Lead

Responsibilities

Generating:

- Modules and Engines

- UI/Views for the Modules and Controllers/API Controllers for the Views.
- Managers for Modules to Handle Business Logic through nugget Package resource

Formulating:

- Presentation Layer Using Razor Views
- Data Access Layer with the help of Entity Framework
- Business Logic Layer using Web Api (Controller) (Server side) and JavaScript (Client side)
- Development and testing of User Interfaces
- Development and testing of different features

Price Trakker.

Apr 2016 - Apr 2017

This product compares the prices with the competitor and suggest the best price.

Role: Sr. Engineer

Technologies used: MVC, .Net , C#, Web API ,Kendo UI

Environment: .Net MVC, Web API Architecture, Entity Framework, SQL Server, Azure Storage, App Servers: IIS7

Responsibilities

Generated:

- Models/ Business Classes for DB Creation with the help of Data First Approach (Entity
- Interfaces for Business Classes & Services (Decoupling)

Formulated:

- Presentation Layer Using Views/ Partial Views with View Models & datatables
- Data Access Layer with the help of Models & DbContext class
- Business Logic Layer using Controllers (Server side) and JavaScript/ AJAX (Client side)

Applied:

- ASP.NET User Identity for User Authentication & Authorization with MVC Attributes
- Used Data tables, Bootstrap, WEB API

Fuel Economy Software.

June 2015 - Apr 2016

The objective of this project is to design application for online trading of collaterals/ bonds for traders in respective banks. Each swaps the collaterals/ bonds among each other by an agreement which is done by this app for the purpose of liquidity of the banks. This application holds two major modules COSWAP which executes the swapping of collateral between banks and REPO manages purchase of Collateral for Cash.

Role: Software Engineer and Architect

Responsibilities

Generated:

- Models/ Business Classes for DB Creation with the help of Data First Approach (Entity
- Interfaces for Business Classes & Services (Decoupling)

Formulated:

- Presentation Layer Using Views/ Partial Views with View Models & datatables
- Data Access Layer with the help of Models & DbContext class
- Business Logic Layer using Controllers (Server side) and JavaScript/ AJAX (Client side)

Applied:

- ASP.NET User Identity for User Authentication & Authorization with MVC Attributes
- Used Data tables, Bootstrap, WEB API, WCF

Technologies used: MVC, .Net, C#, Web API, WCF

Environment: JavaScript, jQuery, Visual studio, GIT

Online Recharge

Nov 14 – June 15

It's part of leading e-commerce web portal 2easy2pay from Kuwait City, which allows users to recharge his local or international mobile number in a few clicks.

Role: Sr. Developer

Responsibilities

Generated:

- SQL Server DB
- Services for CRUD Operations
- Interfaces for Business Classes & Services (Decoupling)

Formulated:

- Presentation Layer Using Components
- Data Access Layer with the help of Entity Framework 6
- Business Logic Layer using Web Api

Environment: C#4.5, .net MVC 5.0, Entity Framework 6.0, MS SQL 11, Java Scripts, jQuery, Web API
AngularJS 2, Git.

Navigators

Oct 2011 - Sep 2014

It's a project management tools which will have all the listed project along with its owner. It shows the progress for the project for each level.

Role: Software Engineer

Responsibilities

Generated:

- Models/ Business Classes for DB Creation with the help of Data First Approach (Entity)
- Interfaces for Business Classes & Services (Decoupling)

Formulated:

- Presentation Layer Using Views/ Partial Views with View Models & datatables
- Data Access Layer with the help of Models & DbContext class
- Business Logic Layer using Controllers (Server side) and JavaScript/ AJAX (Client side)

Applied:

- ASP.NET User Identity for User Authentication & Authorization with MVC Attributes
- Used Data tables, Bootstrap
