Professional Synopsis

- I am working as an Application Developer with IBM Pune with an overall experience of around 8.6 years.
- Hands-on knowledge of React.js, Redux, Asp.Net Core Web(REST) API, .Net Microservice.
- Technical expertise in development, integration, and maintenance of web applications.
- Having almost 4 years of experience in React.js Application development and almost 5 years of experience in Microsoft dot net technologies.
- To extend my entire sincerity and loyalty for the development of organization. Collaborative with clients to fulfill their expectation with the ability to constantly reevaluate customer priorities while delivering timely outcomes.

Key Responsibility Areas

- Analysis of customer requirements to understand the problem domain and to propose the best solutions and to design it.
- Agile development professional works closely to business analysts, testers to identify the features that the software needs.
- Design and develops the user stories as per the acceptance criteria with optimum results.
- Identifying the development issues, brainstorm solutions and constantly improve the quality of the application.
- Participate in peer-programming, reviewing the peer's code for quality and completeness, mentoring the team members towards developing their skillsets, delivering the product.
- Working as Full Stack developer (React.js along with Asp.Net Core REST API)
- Exhibiting agility and diligence during frequent client interactions with sound communication skills.
- Suggesting potential improvements in the existing applications to the client/Team for better optimization.

Technical skills

- **Web Programming**
C#, JavaScript, Typescript, React.js, Redux, React Hooks, ASP.NET Core Web (REST) API, .Net Microservice, Entity framework Core ,HTML, CSS.
- **Azure Services**
Azure functions, durable functions, Application gateway, Azure App, service bus.
- **Design patterns/Architecture**
Microservices, CQRS pattern, Clean Architecture, Repository, n- tiers.
- **RDBMS**
SQL Server, azure SQL, mongo db.
- **Tools**
Visual studio, VS code, IntelliJ, AZURE DevOps Board, Docker, AZURE portal.
- **Version source controls**
GIT, TFS, ClearCase.

Academic Profile

Qualification	Score	Institution
Bachelor of Technology Electronics and telecommunication	65%	Mumbai University
Diploma Electronics and video	84%	M.S.B.T. E

PROJECTS HANDLED

Client All State benefits

Project Title	App Entry Rewrite
Role	Senior DEV – React & Asp.Net Core Web API
Technology	React.js, Typescript, React Hooks, Redux, ASP.NET Core Web API, C#, .Net Microservice, HTML, CSS, Material UI.
Domain	Insurance

Project Overview:

App Entry Rewrite is a Project where legacy desktop App is converted into web-based Application which is used to issue policy for different life, health ordinary and group products.

Responsibilities

- ☐ Created UI Components such as Premium section, product section, Applicant details etc.
- ☐ Involved in mentoring fellow developer, peer-programming and reviewing code.
- ☐ Involved in delivering user stories as per agile methodology.
 - Works Understand the existing code written in ASP.NET of different system and how it works end to end in its whole ecosystem.
 - Implementing the user stories as per the acceptance criteria with optimum results.
 - Involved in sprint review, grooming, and pointing session and accordingly creating task and estimating those.
 - Involved in setting up the scrum in absence of scrum master.
 - Responsible for deploying the user stories in QC and production environment.

Client ICA Banken

Project Title	ICA Banking Application
Role	Senior DEV – React & Asp.Net Core Web Api
Technology	React Js, Typescript, Context API, React Hooks, Storybook ASP.NET Core API, C#, ASP.NET Webforms, HTML, CSS.
Domain	Banking

Project Overview:

ICA Banken is a Project where we are modernizing the existing web application of ICA Banken into new Web Application using React Js and REST API.

Responsibilities

- Works Understand the existing code written in ASP.NET and understand the business logic and implement in React.
- ☐ Created complex Logged in Secure Pages such as Transaction Pages (Account Overview Page), My Profile, Account Information, Personal Loan Details and many more.
- ☐ Involved in mentoring fellow developer, peer-programming and reviewing code.
- ☐ Involved in delivering user stories as per Agile methodology.
- ☐ Involved in Creating individual components in storybook.
- Implementing the user stories as per the acceptance criteria with optimum results.
- Involved in sprint review, grooming, and pointing session and accordingly creating task and estimating those.
- Involved in setting up the scrum in absence of scrum master.

Client	EY GLOBAL INNVOATION
Project Title	EY Predictive Intelligence
Role	Senior DEV – React & .net core Api
Technology	React Js, Redux, JavaScript, ASP.NET Core API, C#, Entity framework, Azure functions, AZURE services, HTML, Semantic UI, CSS.
Domain	Audit

Project Overview:

EY Predictive Intelligence is a Medium Viable Product to automate the tax file processing, which have been created for EY Global Innovation. This web-based tool will help EY Professionals to ease tax file processing from their customers. It is a Single Page Application which has been developed using frontend technology React, Semantic UI and backend technology .NET Core.

Responsibilities

- Works with business analyst and product owner during Backlog refinement to understand the client requirements, brainstorm for the solution and develop user interface.
- ☐ Involved in creating the UI Project architecture based on React .
- ☐ Involved in mentoring fellow developer, peer-programming and reviewing code.
- Implementing the user stories as per the acceptance criteria with optimum results.
- Involved in sprint review, grooming, and pointing session and accordingly creating task and estimating those.
- ☐ Created unit test cases with enzyme and jest.
- ☐ Involved in setting up the scrum in absence of scrum master.

Client	EY GLOBAL INNOVATION
---------------	-----------------------------

Project Title	<u>ARIA – RFE Orchestrator and Document Intelligence (OCR)</u>
----------------------	--

Role	Senior developer (Full stack React JS & .NET Core API)
-------------	--

Technology	Micro-services C#, ASP.NET Core API, React Js, redux, JavaScript, AZURE services, Azure functions, Azure durable functions, Application gateway, HTML, CSS, Semantic UI.
-------------------	--

Domain:	Audit
----------------	--------------

Project Overview:

ARIA was a part of EY ecosystem comprises of few microservices like RFE, Document Intelligence. With the help of RFE orchestrator the client can upload file/evidence and that will be further processed by document intelligence extracting important information which are then passed on further to another service and then displayed this information in application.

Responsibilities:

- Implementing user stories as per acceptance criteria with optimum results
 - Have worked on file upload module on UI side.
 - Have worked on Durable function for document intelligence.
 - a working with Product owner and business analyst to understand their expectation and delivering the need in best possible way.
 - Have suggested to teammates/ client to use durable functions and timer trigger instead of API.
 - Involved in sprint demo, client demo session sometimes presenting it to client in absence of lead. Also in sprint grooming and sprint pointing session accordingly creating task and estimating UI as well API task and delivering it.
- Involved in peer programming and driving scrum call in absence of scrum master.

Client	PGS
---------------	------------

Project Title	Principal global services
----------------------	---------------------------

Role	Senior developer
-------------	------------------

Technology	React JS, Redux, ASP.NET CORE WEB API, GIT.
-------------------	---

Domain	Finance
---------------	---------

Project Overview:

This project was to enhance further as I have joined this project in middle of the sprints. Have to develop modules along with team members and demo it in sprint demo session.

Responsibilities

- I have developed modules as per the acceptance criteria with optimum results.
- understood the application in less time and started delivering it quickly.
- Involved in grooming session and estimating the task accordingly.
- Established regular communication with teammates and Product owners.

Client	AETNA
Project Title	Workability
Role	Senior Developer
Technology	C#, Asp.net, ASP.Net 4.5 FW, Web Forms 4, jQuery, JavaScript, IIS, ASMX web services, SQL Server 2008, Ajax. ClearCase, Web API.
Domain	Insurance

Project Overview:

Workability project was under group insurance domain to get the claim benefits. There were various different types of claims/ Products and we were working on these different products to ease their claim filing process without much manual process.

Responsibilities

- Developing the user stories and delivering it on time with optimum results.
- Developing important modules such CNS, STD etc.
- Established regular communication with teammates and resolved their queries technical or related to requirement.
- I was in constant connect with B.A and Product owner to understand their complex requirement and pass on the same knowledge to my peers.
- Practiced agile development methodology and I was leading a team of 6 members.

Interacting with the business users to understand the requirements and coordinating activities pertaining to finalization of project requirements.

Career Profile

Dates	Organization	Role
Oct 2021 to present	IBM	Senior Developer – offshore lead
Oct 2018 to July 2021	TATA Consultancy services	ITA
April 2018 to August 2018	L&T Infotech	Senior software engineer
Feb 2014 to March 2018	Infosys	Senior software engineer

PERSONAL DETAILS

Date of Birth	26 Sept 1991
