- High School (2007) from Board of Secondary Education (BSE) Orissa with 87.5%.

Technical Expertise:

- **Programming Languages**   **:** C#.NET
- **Microsoft Technologies**   **:** Win Forms, ADO.Net, ASP.NET, WCF, LINQ
- **Web Technologies**   **:** Razor CSHTML, Web Services
- **Middle Tier**   **:** Internet Information Server, ADO .NET
- **Scripting Language**   **:** JavaScript programming, HTML, knock out js
- **Technologies**   **:** JQuery, CSS
- **Languages**   **:** HTML 4.0, XML
- **Database**   **:** SQL SERVER 2016, PL/SQL
- **Framework**   **:** .NET Framework 4.
- **Tools**   **:** WINSCP, Visual Studio 2015, Tortoise GIT, SVN

- **Maintenance Tools** : JIRA, FOGBUGZ, BMC Remedy IT Service Management

Project Experience:

Project:

  Title   : Ambit Asset Finance
  Technologies : C#, MS.Net 4, MVC, Web, Oracle and SQLSERVER
  Environment : Software Engineer
  Role   : Lead

Description:

Ambit Asset Finance is an asset management product that helps in the lease/loan life cycle of assets. It includes features such as origination, servicing, cash management, collections and inventory management.
My role in this team has been varied since my joining. I initially worked in the client services team as a developer and then moved to project delivery and performed roles of a senior developer, development spock and occasionally scrum master.

Responsibilities in Ambit Asset Finance:

- Extensive knowledge in FIS product; core functionality and processes.
- Provided services and technical support to clients.
- Implementation and product configuration in client environment.
- Strong knowledge on SQL scripting and addressing client's database issues.
- Currently part of the development team, having knowledge and experience in developing and designing web application.
- Part of the core teams for code review and database review, responsible for maintaining code quality and standards for all implementations done from this development centre.
- Extensive knowledge of product and features developed for clients.
- Gained expertise in bespoke development done using plugins for clients and supporting the consulting team for implementation of the same.
- Managing smooth implementation of the application at client environment.
- Expertise in certain functional areas such as Business Rules, Bank Interfaces, Credit Checks, Pricing Calculations, Custom Flows and Custom Field calculations, and interfacing with third party services.
- Created test plans and testing interface for unit and integration test.
- Implemented DS Plugins by communicating directly with the consultants and customer.
- Troubleshooted issues raised with high severity during implementation and resolved within a quick timeline.

Project:

Title   : IKEA Furniture
Technologies   : C#, MS.Net 4, Visual Studio. NET, ADO.NET, ASP.NET, JavaScript and PLSQL
Environment   : Software Engineer
Role   : Dot net Developer

Description:

Involved in developing application for IKEA Furniture Company. The application provides a tool to perform auditing, view audit status, and generate reports for user such as suppliers, office administrators and sub-suppliers. This application was used by around 100,000 suppliers and had their details. Their details are created through login forms and data received from source system.

Roles & Responsibilities:

- Responsible for planning, processing and performing all the jobs in efficient manner.
- Responsible for designing, coding, testing and database management using ASP.Net, C# and SQL Server.
- Designed database maintenance plans to set up core maintenance tasks, to make sure that the database performs well and is regularly backed up in case of system failure and is checked for inconsistencies.
- Designed and developed programming systems making specific determinations about system performance.
- As a team, created various reports based on customer business requirements.
- Experienced in database stored procedures and triggers.
